Travel Info

EVERYTHING YOU NEED TO KNOW

How to Get to Kenya

Nairobi, the capital of Kenya, is well served by a number of international air carriers, including the national carrier, Kenya Airways. Other airlines currently flying direct to the capital include British Airways, KLM / AirFrance, Lufthansa, Turkish Airways, Etihad, Emirates, Qatar Airways, with numerous code-share options available. For an up-to-date schedule, please consult your preferred travel agent or online resource.

Passport & Visa Requirements

Many nationalities, including the US and the UK, require a visa to enter Kenya, prior to arrival. A single-entry visa must be obtained before arriving in the country, which allows you to remain in Kenya for up to 90 days. The single-entry visa's current fee is US\$51 (subject to change), and obtainable through the [eCitizen](#) website (manual applications are not accepted). For a list of nationalities requiring a visa, please refer [here](#).

Please make sure your passport is valid for a minimum of six (6) months after your journey ends and you should have a minimum of two (2) blank visa pages for entry and exit stamps.

COVID-19 Requirements: Before Travelling to Kenya

All passengers travelling into and out of Kenya are required to abide by the travel, health and COVID-19-related requirements of Kenya and any other

destination country. Please see the latest Kenyan government [COVID-19 Travel Requirements](#) for more details and the requirements below.

Vaccination Status

All travellers are required to provide a valid vaccination certificate for entry into Kenya. Only the following categories are except from vaccination:

- If you have medical conditions that prevent you from being vaccinated. In this case, you must provide a signed / stamped letter from a recognised medical practitioner to that effect.
- If you have recovered from an active COVID-19 infection or received convalescent plasma in the previous 90 days – a signed / stamped letter from a recognised medical practitioner must be provided.

Vaccination Certificates and Test Results

You must upload your vaccination certificate or test results to the Global Haven website (www.globalhaven.org), part of the African CDC's Trusted Travel platform, before boarding your flights. Vaccination certificates must be completed a minimum of 14 days before entering the country. Unvaccinated travellers must upload a valid COVID-19 negative PCR test certificate conducted within 72 hours before departure. Children under five (5) years old are exempt. A form with a QR code will be generated, please print this out to present to officials upon request. No paper vaccination cards or test results will be accepted.

COVID-19 Requirements: Arriving in Kenya

Upon arrival, please provide the Health Official with the printed copy of your Global Haven QR code.

Required Testing

All unvaccinated travellers must undergo a rapid antigen test at their own cost (US\$30) upon arrival to JKIA. Anyone who tests positive on this must undertake a PCR test at their own cost (US\$50) and self-isolate. Children under five (5) years old are exempt. Costs of these tests are subject to change. If you are fully vaccinated, you are exempt from testing.

Other approved testing sites can be found here: <https://kcaa.or.ke/covid-19/approved-pcr-testing-labs>.

COVID-19 Requirements: When Leaving Kenya

Testing and other requirements depend on which airline you'll be departing with and the particular travel, health and COVID-19 related requirements of your destination country.

Required Testing

If you are travelling to a country that requires antigen testing some hours before you travel, you can undertake a pre-travel rapid antigen test at the Ministry of Health's Port Health facility at JKIA airport. The results will be uploaded to the Trusted Travel platform.

If you require testing for a connection for your onward travels from Angama Mara, the lodge team can arrange for testing to be done on site. Please speak with your travel planner to arrange.

Yellow Fever & Malaria

Many countries require travellers to have a Yellow Fever certificate prior to returning from a visit to Kenya, including children from the age of 9 months. For updated advice, we recommend consulting the relevant pages on the

World Health Organisation's (WHO) website, and checking their list of specific country requirements: <https://www.who.int/>

Malaria is present in Kenya, although less so in the higher altitudes.

Regardless, for this, and for any other vaccinations, we recommend that you consult a specialist travel physician or travel clinic prior to travelling.

Travel Insurance

All guests should get travel insurance prior to their safari and check that their health provider covers their travel and any hospital admissions while in Kenya.

Soft Bags & Weight Restrictions

Please note that scheduled flights to the Mara carry a luggage restriction of 15 kg (33 lbs) per person in soft bags, including carry-ons, camera equipment, etc. The dimensions of the bag should not be more than 58 cm (23 in) long x 33 cm (13 inches) high x 25cm (10 in) wide. The carriage of excess baggage is at the sole discretion of the airline and may be subject to additional charges. Soft bags and/or storage are available at Wilson Airport should these be required.

What to Pack

Our Co-founder Nicky Fitzgerald has years [advice for you here](#), but in a nutshell:

- Comfortable cotton clothing
- A light jacket and/or warm fleece
- Comfortable walking shoes
- Sunhat, sunglasses, sun block
- Bathing suit
- An extra pair of reading glasses (if you need 'em)
- Camera, binoculars, extra memory cards, charging equipment

Plastic Bags

In an effort to reduce the impact on the environment, Kenya has recently made the use and importation of all plastic bags illegal. The ban applies to carrier bags, flat bags, zip lock bags, etc. with extremely severe consequences if not complied with. Plastic bags (including those from duty-free shopping) are known to be confiscated upon arrival in Nairobi. In line with this base, Angama properties are a plastic-bag-free, and a proud partner of TAP – [Travelers Against Plastic](#).

Medical Emergencies & Evacuation

All guests at Angama properties are covered by an insurance policy for evacuation due to a medical emergency, of up to US\$25,000 – which would typically include evacuation by fixed-wing plane directly from Angama Airfields to Wilson Airport in Nairobi and transfer to the renowned Nairobi Private Hospital.

For your peace of mind, AMREF are the subcontracted transport providers.

Trained paramedics and nurses are available on call 24 hours a day, 7 days a week, and can assist with any diagnosis or treatment advice should it be required, as well as dissemination of medical supplies which is regularly restocked and is compliant with the Interhealth Worldwide base kit. South African-qualified doctors are also available over the phone should they be required. These services are provided by Africa Assist.
